\*Performance data is based on a connected-load photometric test of MED output with 80 CRI at 4000K using a DALI driver and DIFF lens. Data values for all other outputs are extrapolations.

^Performance data is extrapolated based on a 4000K setting. Cooler and warmer CCT setttings will provide a slight decrease in performance – lower Im/m, higher W/m, and lower Im/W.

#### **LENS OPTIONS**

DIFF is a white satin, flush diffuser lens that produces smooth, even light across the lens surface.

Diffuse **DIFF** 

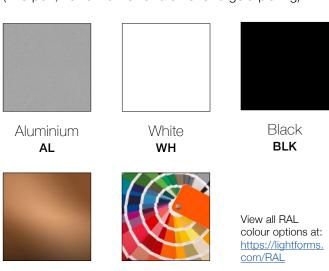

#### **SPECIFICATION DETAILS**

#### **HOUSING**
